PROFILE

Motivated Computer Science graduate with hands-on .NET development experience building full-stack applications using **ASP.NET Core MVC, C#, Entity Framework Core, and SQL Server**. Experienced in developing secure, scalable, and database-driven applications, including inventory management and e-commerce systems with authentication, role-based access control, cart, checkout, and order management. Strong understanding of OOP, MVC architecture, and modern web development practices.

PROJECTS

Online Shopping Cart System (Web Forms)

- Developed a web-based e-commerce application using **ASP.NET Web Forms, C#, ADO.NET, and SQL Server**
- Implemented core functionalities including product listing, shopping cart management, checkout process, and order placement
- Designed user authentication and role-based access to manage customers and administrative operations
- Built database-driven features for product management, order tracking, and customer data handling using SQL Server
- Applied **Object-Oriented Programming (OOP)** concepts, CRUD operations, and event-driven architecture to ensure a structured and maintainable application

Inventory Management & E-Commerce Management System

- Developed a full-stack Inventory Management and E-Commerce system using **ASP.NET Core MVC, Entity Framework Core, SQL Server and Identity**
- Implemented user authentication and role-based authorization (**Admin/User**) with protected admin routes and separate user workflows
- Built modules for inventory management, product and category CRUD, shopping cart, checkout, order placement and order history tracking
- Designed separate admin dashboard and user interfaces with role-based layouts, enabling inventory control, order management and customer-side shopping experience
- Admin panel includes product, category, inventory and order management, while users can browse products, manage cart, place orders and track purchases
- Focused on secure database integration, maintainable MVC architecture and real-world e-commerce workflow implementation

EDUCATION

BS Computer Science

University of Science and technology Bannu

Graduate 2025

Bannu

- **Coursework:** OOP, Databases, Software Engineering, Web Development

SKILLS

Languages: C#, SQL, JavaScript, HTML/CSS

Frameworks: ASP.NET Core MVC, Entity Framework Core, Bootstrap

Database: SQL Server

Concepts: OOP, MVC, CRUD, Authentication, Authorization, Role-Based Access Control

Tools: Visual Studio, Git, GitHub
